

Noor Ullah

Machine Learning Engineer | Applied AI & Software Engineering

Islamabad, Pakistan | +92 334 4242455 | noorullahsb@outlook.com | linkedin.com/in/noor-ullah007 | noor-ullah.me

Summary

Machine Learning Engineer and Software Developer with a research-driven approach to building scalable, high-impact AI systems and production-grade software. Combines applied expertise in deep learning and computer vision with full-stack engineering experience, including architecting high-performance Python backend services, optimizing marketplace algorithms, and streamlining CI/CD pipelines. Brings end-to-end capability across the ML and software lifecycle, from data curation and model development to deployment, performance optimization, and cross-functional delivery, with a proven track record delivering results in both academic research and industry settings.

Technical Skills

Machine Learning	Supervised Learning, Deep Learning, Transfer Learning, Model Evaluation, Data Augmentation, Experiment Design & Analysis
Computer Vision	Object Detection, Image Segmentation, Image Classification
Software Engineering	Full-Stack Development, REST API Integration, SQL & Database Optimization, CI/CD Pipelines, Automated Testing, System Observability
Tools & Frameworks	Python, PyTorch, TensorFlow, OpenCV, NumPy, Pandas, Scikit-learn

Professional Experience

Lead Researcher, British Council Funded International Research Project Jul 2025 - Jun 2026

Quaid-i-Azam University, Islamabad

- Led research activities in Pakistan for a British Council-funded UK-Pakistan collaborative project, partnering with the University of West London and the University of East London.
- Directed study design, data collection coordination, and analysis at Quaid-i-Azam University in alignment with defined project work packages.
- Applied machine learning-driven analysis and experimentation to support project deliverables.

Full Stack Software Developer, Kosmic AI Aug 2024 - Jul 2025

Remote - Middletown, DE

- Engineered AI video generation pipelines by architecting and deploying high-performance Python backend services, powering core video creation features with stable third-party API integrations.
- Designed and optimized marketplace algorithms, improving data sorting, resource matching, and overall platform efficiency.
- Optimized system performance and streamlined CI/CD pipelines through database query tuning, backend profiling, observability protocols, and automated build and testing gates, improving reliability and release predictability.
- Collaborated cross-functionally with Product and Design teams to translate complex AI and marketplace requirements into clear technical scopes and intuitive user flows.

Education and Certifications

MPhil in Computer Science, Quaid-i-Azam University 2024 - Present

BSCS, PMAS Arid Agriculture University 2020 - 2024

[AI For Everyone](#), DeepLearning.AI 2025

[Digital Information Literacy](#), The State University of New York 2025

[Introduction to Mobile Development](#), Meta 2023

[Technical Support Fundamentals](#), Google 2022

Additional Information

Languages: English, Urdu | **Interests:** Building custom PCs, E-sports, Chess, Hiking
